

Primary Cannabinoids

Our CBD + Minor Cannabinoids Collection offers unique formulations with curated ratios of rare cannabinoids. Read more to find out which ones might be right for you.

CBD (Cannabidiol)

Naturally non-psychoactive, CBD is one of the most highly discussed cannabinoids. Gaining quick popularity, CBD is commonly used to address anxiety, insomnia and many chronic pains.

CBG (Cannabigerol)

Often referred to as the “Mother of all Cannabinoids” CBG is the precursor of popular cannabinoids THC, CBD, and CBC. CBG is known to improve mood, reduce inflammation, and is an anti-microbial.

CBN (Cannabinol)

A rising star in the world of cannabinoids, CBN is a mildly psychoactive cannabinoid that is often found in matured plants. CBN is naturally produced from THC degradation and may be used as a potential sleep aid.

THC (delta-9-tetrahydrocannabinol)

Popular among recreational cannabis users, THC or the “superstar” of cannabis is known for producing the psychoactive effects. It is also known to produce euphoric feelings, stimulate appetite and relieve anxiety.

Primary Terpenes

Terpenes are a large class of naturally occurring compounds that are responsible for the flavors, aromas, and therapeutic benefits that are produced by a variety of plants including cannabis; they play a huge part in the overall experience of our products.

	Caryophyllene	Humulene	Limonene	Linalool	Myrcene	Pinene	Terpinolene

cbd + Minor Cannabinoids

With effective ratios such as 10:1:5 and 5:1:5, this line appeals to consumers looking to micro-dose throughout the day, explore implementing cannabis into their daily routine, or experience a smoother cannabis without the adverse effects associated in high-concentrated products. Our reformulated ratio line goes beyond CBD and THC, harnessing the entire wellness potential of the cannabis plant. Each CBD blend features our signature live whole plant extract paired with a unique ratioed combination of natural botanicals, terpenes, key cannabinoids like CBG and CBN, and other essential bioactive ingredients that work in synergy to provide the ultimate wellness benefits.
