# Our Roots

As a brand leader in premium cannabis, Kurvana continues to transform the industry by offering innovative products of uncompromising quality, sitting at the intersection of nature and science. With their focus on the development of highly intrinsic oil, Kurvana delivers multiple options for connoisseurs and beginners alike. Since 2014, Kurvana has surpassed the industry's standard of quality, formulating natural botanical ingredients to create some of the world's best cannabis and hemp products. Today, Kurvana is widely recognized by its commitment to enhancing the everyday life of consumers with the most natural, pure, and safe products in the cannabis and hemp space.

# Our Features

01 —

## **SIX UNIQUE AND EXCLUSIVE COLLECTIONS**

We are proud to offer six unique Collections exclusive to us. We allow our passion for science, art, and innovation dictate how we shape our brand's offerings.

03 —

## **ONLY THE HIGHEST QUALITY OIL**

Our oils are born in California's Central Coast with unique and stable genetics from top producing growers with the highest cultivation standards in natural growing methods. The oils are held to the highest standards of quality control from the cultivation phase to finished products.

02 —

## **QUALITY, TRUST, AND VARIETY**

By holding ourselves to the highest standard, each product we bring to market is curated from start to finish to ensure we only output the best top-tier products.

04 —

## **PROPRIETARY MANUFACTURING METHODOLOGIES**

We use a live whole plant manufacturing process to purify the essential cannabinoids, terpenes, flavonoids, and other bio-active ingredients that contribute to the unique experience of vaping or ingesting Kurvana's full-spectrum oil.

05 —

## **CONSISTENT QUALITY & INVENTORY LEVELS**

Our manufacturing and distribution entities are vertically integrated and are constantly improving year over year. We understand the importance of ensuring each customer that walks through your door leaves with the Kurvana product they intended to purchase.

06 —

## **RELIABLE, STATE-WIDE DISTRIBUTION**

Our distribution network is capable of supplying 100% of California's dispensaries and delivery services. We offer our partners lightning-fast fulfillment with a white glove experience.

CARBON<sub>21</sub>

FOR THE  
CONCENTRATE  
ENTHUSIAST.

DIAMONDS

BADDER

HASH ROSIN

SAUCE

**INTRODUCTION** \_\_\_\_\_ Expertly curated concentrates that celebrate the rich complexity of the original living cannabis plant.

CARBON<sub>21</sub> is our pinnacle vape line, consisting of carefully curated raw concentrates in our latest hardware. We pair our proprietary live-plant curation with a unique extraction method for each strain in this line. Deliberately crafted in small batches, each strain is presented in its rawest concentrate form—rich with the cannabinoid, flavonoid and terpene complexities of the live cannabis plant. An experience most similar to dabbing your favorite concentrates. CARBON<sub>21</sub> is the quintessential, artisanal vape experience.

**RAW CONCENTRATES** \_\_\_\_\_ Each plant is meticulously harvested using a method specific to its genetics, resulting in a pinnacle extract with unmatched aroma and taste.

It starts at the aromatic epicenters of our California grows, where passionate cultivators meticulously hand-harvest each plant at the exact moment of optimum terpene and flavonoids levels. Without a moment to lose, the selections are immediately pressed and extracted or cryogenically frozen - effectively capturing and preserving the full body potency, aroma, and taste that Kurvana is known for. Throughout the process, we go to great lengths to minimize all air, heat, and light exposure to the concentrate in order to preserve its raw flavor and taste. The result is an unforgettably pungent, virgin concentrate with a robust range full of cannabinoids, terpenes, and flavonoids.

1

## CURATED GENETICS

**CARBON<sub>21</sub>** - starting with the best genetics, our plants are bred to be experienced as concentrates. However, it takes more than top shelf flower to make the best concentrates. Our genetics are carefully chosen based on the distinct, naturally produced phytochemical profiles within the plant's glandular trichomes.

2

## PRODUCTION

In a single run, our expert team employs various extraction methodologies to harvest the essential cannabinoids, terpenes, and flavonoids. Our meticulous production methods collect more natural terpenes than most other solvent extractions, leaving an unforgettable taste and true full-spectrum effects.

3

## FILLING AND STORING

As we continue down the manufacturing process, our concentrates are always stored at cool temperatures, in low light conditions, and inside specialty airtight glass jars. Any exposure outside of these parameters can lead to unwanted degradation. Each completed batch is refrigerated until delivered to retailers. Furthermore, our latest delivery system is sealed airtight and the packaging reduces light exposure.

## CARBON<sub>21</sub> DIAMONDS

Diamonds are the crystalline structures that develop in sauce, a cannabis concentrate with high levels of terpenes and a glossy runny texture. Concentrated by using a closed-loop system that allows the resulting solution to settle under various pressures and temperatures. This environment promotes the natural separation of the major cannabinoids, including THCa in the form of diamonds resulting in a terpene-rich, liquid with THCa diamonds.

## CARBON<sub>21</sub> BADDER

CARBON<sub>21</sub> Badder is one of many extraction methods we use to produce a potent concentrate with high levels of THCa (tetrahydrocannabinolic acid) and incredibly robust, raw terpene profiles. The quality of our whipped, cake-like badder concentrates paired with our proprietary extraction processes creates a clean, smooth, and on-the-go vape experience worth sharing.

## CARBON<sub>21</sub> SAUCE

CARBON<sub>21</sub> Sauce is one of many extraction methods we use to produce a concentrate with high levels of terpenes and incredibly robust flavor profiles. The concentrated batches are curated by employing sub-zero temperatures and strain-dependent techniques to help control the consistency and viscosity throughout the extraction process, allowing cannabinoid compounds to crystallize. The result is a high terpene and cannabinoid sauce concentrate ready to be enjoyed without dabbing hardware.

**A DAB EXPERIENCE** \_\_\_\_\_ Breakthrough vaporizer technology offers a full unlocked taste that reveals the robust range of a full-spectrum concentrate.

To help you experience the true essence of our carefully Curated Concentrates, the unrivaled draws of our **CARBON<sub>21</sub>**'s breakthrough vaporizer offers full-bodied tastes that reveal the robust range of a full-spectrum extract. Our newly updated CTC 2.0 heating element provides 360° oil contact for clean, consistent vaporization down to the last draw. The embedded coil design generates ideal temperatures that preserves both flavor and cannabinoid profiles – all while providing minimal air exposure to the concentrate.

01

## **A DAB EXPERIENCE**

A complete flavor and effect experience without the complexity of a torch, rig, or complicated setup

02

## **ERGONOMIC ALUMINUM MOUTHPIECE**

Lightweight, medical-grade and anodized aluminum mouthpiece designed for comfort

03

## **FOOD GRADE MATERIALS**

From high quality stainless steel to our BPA-free tank, we kept safety and contamination in mind

04

## **STAYS FRESHER LONGER**

Our housing tank reduces natural oil oxidation that keeps it fresher longer

05

## **CTEC 2.0 HEATING ELEMENT**

Premium ceramic heating element composition and material refinement

06

## **PRECISE CONCENTRATE VAPORIZATION**

Precise pore sizes for optimal concentrate vaporization and dose control

# ASCND

# THE AUTHENTIC **HIGH-POTENCY** COLLECTION.

**EXCEEDING 95% CANNABINOIDS**

**FULL-SPECTRUM EXTRACT**

**LIVE WHOLE PLANT**

# 1

## OVERVIEW

ASCND is the culmination of the latest extraction science, advanced device technology, and our full-spectrum oil for the purest expression of potency and taste. The line originated in 2017 from a small, in-house project designed to create the most potent vape cartridge available without sacrificing quality. Because highly potent cannabis oils yield subtle taste profiles, the ASCND profiles are mellow and light. However, do not be misled by ASCND's delicate taste and elegant device; with potencies exceeding 95%, its effects are instant and intense.

# 2

## INNOVATIVE SCIENCE

Throughout each step in our proprietary process, we make it our mission to preserve each plant's phytochemical fingerprint, which is essential to our oil's true-to-strain taste. We do not add artificial flavorings, glycols, or thinners because they distract from the plant's original essence. In other words, our oil tastes natural because it is.

# 3

## QUALITY

We run up-to-date, full-panel analytical tests at multiple stages of the production process. From cultivation to extraction, we thoroughly analyze every Kurvana product by third-party labs, who post these results on their website. Using these rigorous quality assurance methods, we can guarantee that Kurvana products are free of solvents, microbials, additives, pesticides, and toxic chemicals.

# 4

## THE EXTRACT

ASCND oils are high-cannabinoid, full-spectrum, single-origin extracts. These oils have the ideal composition for users who appreciate heavy psychoactive effects and a true-to-strain flower or weedy taste profile, while still retaining crucial bioactive terpenes and flavonoids.

ASCND Collection

Dutch Treat

Northern Lights × Haze

Indica | Pine, Sweet, Citrus

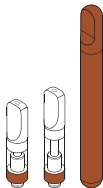

Dense, sweet pine following a citrusy aftertaste results in quick cerebral effects for relaxing the mind.

# WELLNESS MADE SIMPLE

✱ **EXCEEDING 80% CANNABINOIDS**

✱ **3 UNIQUE AND EFFECTIVE RATIOS**

✱ **LIVE WHOLE PLANT**

# 1

## OVERVIEW

Our reformulated ratio line goes beyond CBD and THC, harnessing the entire wellness potential of the cannabis plant. Each blend features our signature live whole plant extract paired with a unique ratio of natural botanicals, terpenes, key cannabinoids like CBG and CBN, and other essential bioactive ingredients that work in synergy to provide the ultimate wellness benefits.

## INNOVATIVE SCIENCE

The exclusive technology platforms developed by our team of scientists has allowed Kurvana to combine cannabis with a wide spectrum of botanicals with intriguing results. Our line exudes freshness, intensity and an organic, vibrant taste. Today, we offer our reformulated line that reflects the latest achievements of our natural products technology platform. The result is a fresh, natural fruit taste with an even smoother finish.

# Hardware

# SIGNATURE DEVICES

# 1

## OVERVIEW

Kurvana's Hardware Devices are precision manufactured with the highest standards of quality, reliability, and safety. Our CTEC 2.0 ceramic heating technology delivers unrivaled efficacy, flavor, and performance. From high quality stainless steel to our BPA-free tank, we keep safety in mind.

# 2

## OPTIMAL PERFORMANCE WITH EVERY CARTRIDGE DEVICE

### Longer Lasting Oil

Our housing tanks and seals reduce natural oil oxidation that keeps it fresher longer

### Precise Air and Oil Flow

Precise pore sizes for optimal oil flow and dose control

### 510 Thread Connection

Universal compatibility with our standard 510 thread connection hardware

3

## A SAFER EXPERIENCE

### Heavy Metals Compliant

Lead: <0.0025 ug/g  
Arsenic: Not Detected  
Cadmium: Not Detected  
Mercury: Not Detected

### Stainless Steel Construction

Manufactured with the  
highest standards of quality,  
reliability, and safety

### BPA-Free Tank

Proprietary housing tank  
designed for full compatibility  
with our extracts and terpenes

4

## CTEC 2.0

Our latest premium ceramic heating element features new material composition and refinement that heats without burning the wicking system and prevents chemical leach.

# Hardware Collection

## Cartridges

With our latest performance improvements, our hardware has been reengineered to outperform all previous generations of cartridges.

### Features

- **Construction**
  - High Quality Stainless Steel Internals
  - CTEC 2.0 Ceramic Heating Element

CBD:CBG:THC

## BALANCE 1:1:1

Suited for everyday use. This wellness tincture provides daily balance to the mind and body by combining key cannabinoids with organic ingredients.

### Bioactive Ingredients

- CBD (Cannabidiol)**  
Commonly used to address anxiety, insomnia, and many chronic pains.
- CBG (Cannabigerol)**  
Known to improve mood, reduce inflammation, and be anti-microbial.
- THC (Tetrahydrocannabinol)**  
Responsible for euphoric effects, stimulate appetite and relieve anxiety.

Total Cannabinoids  
**1,200.00 mg**

Total CBD	Total CBG	Total THC
400.00 mg	400.00 mg	400.00 mg

CBD:CBN:THC

## CALM 20:1:1

A non-habit forming tincture to help you relax, induce a sense of tranquility, and bring moments of calm when needed most.

### Bioactive Ingredients

- Ashwagandha**  
Assists with cortisol management and stress relief.
- Blue Tansy**  
Reduces nasal congestion and induces calming effects.
- Lavender**  
Reduces anxiety, stress and aids with sleep issues.

Total Cannabinoids  
**2,420.00 mg**

Total CBD	Total CBN	Total THC
2,200.00 mg	110.00 mg	110.00 mg

\*Potencies vary by batch.

# Tincture Collection

CBD:CBG:CBN:THC

## DREAM 1:1:4:2

An exotic tincture aimed to promote a healthy sleeping pattern with its inducing sense of tranquility, guiding you into a calming state of peaceful nirvana.

### Bioactive Ingredients

- Reishi Mushroom**  
May improve sleep, enhance the immune system, and lessens fatigue
- Kava Kava**  
Commonly used to promote a state of relaxation and reduce stress
- Lemon Balm**  
Can help soothe systems of stress and ease insomnia

Total Cannabinoids

# Our Brand

# OUR LEGACY AND FUTURE

# Memorable Branding

## DESIGN LANGUAGE

In effort to unify our brand, our Collections live, breath, and speak Kurvana. Each product follows a strict design language that creates visually harmonious and coherent design to give our products a unique, but consistent look and feel. Our packaging not only helps consumers and budtenders easily find the right product, it also has a direct impact on the overall experience they have when they interact with our brand.

### Features

→ **Color System**

Each strain features a unique color to convey the dominant flavor and/or effect. As a general guide, we often select :

**Indicas** | Dark blues, purples, reds, and greens

**Hybrids** | Low - mid saturated oranges, pinks, and blues

**Sativas** | Saturated greens, yellows, oranges, and reds

→ **Strain Name Abbreviations**

In addition to the unique color for each strain, we also offer strain abbreviation on our devices. We generally use the first 3 letters of the strain name and first letter of the second part. See examples below:

*Common*

**Northern Lights** = NORL

**Purple Punch** = PURP

*Exceptions*

**G.S. Cookies** = GSCO

**C. Jack** = CANJ

**Cactus Cooler** = CACT

**Space Walker OG** = SWOG

→ **Strain Type Indicators**

First introduced in 2016, our cartridges and all-in-ones feature triangles to indicate an indica, hybrid, and sativa strain.

**Indica** | Arrow pointing down

**Hybrid** | Arrows pointing down and up

**Sativa** | Arrow pointing up

# KURVANASCOPE LABELING

Every Kurvana product and collection utilizes our custom labeling and packaging. First introduced in 2017 with ASCND, **KurvanaScope** compliant labeling offers unprecedented lab transparency that showcases everything a consumer wants to know prior to purchasing, and everything a budtender needs to guide their customer, at a glance.

## Features

- **Front Panel**

  - Strain Name
  - Strain Type
  - Strain Genetics\*
  - Strain Attributes
  - Strain Description
  - Regulatory Requirements
- **Rear Panel**

  - Screen Summary
  - 5 Primary Terpenes
  - Cannabinoid Profile
  - LUCID ID
  - Regulatory Requirements

\*Applicable to ASCND and CARBON<sub>21</sub>

# KURVANA X LUCID

As a leader in high potency, pure cannabis, Kurvana defines quality as everyone’s responsibility to deliver the most natural and safe products that exceed regulatory standards and consumer expectations. To ensure that goal, Kurvana has partnered with vLUCID to authenticate Kurvana products, view lab results, and sign-up for a brand new **Kurvana Rewards** Program in which customers will collect reward points to be hooked up with swag, discounts, and other exclusive offers.

## SIGNATURE PACKAGING

Our packaging makes it easy to merchandise your retail store while standing out as a premium and trusted product. From the hits of silver foil to our child-resistant locking system, our packaging was designed and developed to have a striking, eye-catching appearance. We've made countless iterations to our packaging to get it just right.

### Features

#### → Structure

- Up-to 85% Recycled Materials
- Protects Oil From Direct Light
- Certified Child-Resistant
- Rigid and Reusable

#### → Design

- Silver Foil (Decorative Panel)
- Collection and Strain Specific
- Premium Look and Feel

## OUR SUSTAINABILITY PROMISE

Kurvana is committed to ethical low impact production and high impact initiatives, balancing quality and longevity of product with responsibly sourcing materials. Our packaging uses recycled, low impact, and natural materials whenever possible, weighing the sustainability/impact of the material with the durability and aesthetic function of the design as a whole.

# 360° Marketing Programs

## CURATED MARKETING

Our partners mean everything to us so we've developed and curated our programs to reach new and existing customers at all possible points of contact. We focus more specifically on a 360-degree marketing program that allows us to utilize all the resources available to reach our customers.

**MERCHANDISING OPPURTUNITIES**

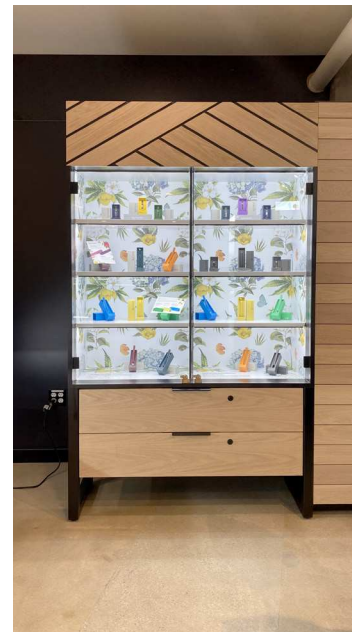

## STAFF TRAININGS

We invest heavily into our staff training to ensure retail staff have the tools and resources needed to recommend and sell our differentiated line of products. By leveraging our team of brand ambassadors, we can support and highly recommend monthly and quarter trainings to stay up-to-date with our brand, products, and initiatives. We also have the ability to train and present virtually if so desired.

## BRAND AMBASSADORS

- **Additional Support**
  - Staff Education + Trainings
  - Monthly In-store Activations (P.A.D.)
  - Special Event Partnerships
  - Merchandising Assistance

# MONTHLY PROGRAMMING

To drive sales into your business, we offer month-long promotions to increase brand awareness and sell-thru at retail.

All partners are allowed to participate in BOGO discounts and promotions. All BOGO promotions imply that at least one unit was purchased at full price + tax and at least one promotional product is purchased at a minimum of \$0.01 + tax.

All cannabis products used in the promotions will be within 120 days of expiration. All non-cannabis goods used in the promotion will have exceeded 12 months at the warehouse or overseas. This does not include exceptions such as product launches and product phase-outs.

Excise tax based on the information above is required for this transaction. Normal track-and trace and delivery procedures apply.

Retailer will be responsible for tracking and reporting all POS data.

# BUDTENDER INCENTIVES

We are committed to rewarding the best performing staff with monthly incentives that increase brand awareness and sell-thru at retail.

We are committed to making a best-in-class program that allows participants engage with our brand. Participating staff can get rewarded exclusive brand experiences, gift cards, Kurvana products, and genuine merchandise.

To get started, all partners must opt-in to participate and receive the necessary criteria. Retailer is responsible for accurately tracking sales and performance of participating staff.

# Wholesale and Retail

## MASTER 10 PACK BOXES FOR CONVENIENCE

In an effort to help speed up deliveries for our valued partners, orders ship in conveniently labeled 10-pack boxes. The box labels clearly display METRC, and strain information that facilitate easy ordering and inventory management.

### Features

- Product Line
- Strain Name + Abbreviation
- Strain Color
- Strain Type
- Content Net Weight
- Quantity
- Batch ID
- Associated UPC

## SUPPLY CHAIN AUTOMATION WITH LUCID IDS, CASE IDS & LUCID RETAIL

We partnered with LUCID to offer a Touchless Inventory Management solution. The era of manual product intakes and stickering are long gone.

### Features

- No Additional Stickering by staff
- Fast Truck-to-Shelf Processing
- Import Entire Cases of Items with One Scan
- Automate No-Touch Catalog Management
- Cut Down Cycle Counting Efforts by 60%
- Eliminate Manual Entry Errors

# Purchasing + Orders

## PREFERRED WHOLESALE RATES

Our preferred wholesale rates are competitive and strategic. If you are interested in learning more, please contact us directly or ask your Territory Sales Manager.

## 60-DAY GUARANTEE PROGRAM

Kurvana will extend a 60-day guarantee on all new products brought onto a retailers menu. In order to validate the guarantee the retailer must adhere to the following activations to ensure the new products are given the best opportunity to sell:

- Increase in-store presence w/ PAD's hosted by a Kurvana Brand Ambassador
- Schedule a Staff Training highlighting new products
- Accept Staff Samples of new products
- Participate in Monthly Budtender Incentives
- Participate in Monthly Consumer Promotions
- Consider Premium Product Placement

If these obligations are met, we will credit the retailer for these items.
